1 General Descriptions

1.1 Introduction

The C060SWR5-1 is a color active matrix thin film transistor (TFT) liquid crystal display (LCD) Sub Sheet that uses amorphous silicon TFT as a switching device. This TFT LCD panel (Single Chip) has a 5.99 inch diagonally measured active display area with HD resolution (720 horizontal by 1,440 vertical pixels array).

1.2 Features

- 5.99 Inch TFT-LCD Panel
- Supported HD Resolution
- Compatible with RoHS Standard

1.3 General Characteristics

Table 1 General Characteristics

Item	Specification		Unit	Note
Outline Dimension (H x V x D)	70.04x141.897x0.80		mm	Single Chip
Active Area (H x V)	68.04x136.08		mm	Single Chip
Number of Pixels (H x V)	720 x 1,440		-	Single Chip
Pixel Size (H x V)	0.0945x0.0945		mm	Single Chip
Pixel Arrangement	RGB Stripe		-	-
Display Type	Transmissive		-	-
Display Mode	Normally Black		-	-
Cell Thickness	CF: 0.40±0.04		mm	Single Chip
	TFT: 0.40±0.04			
Driver IC(Recommendation)	ILI9881C		-	-
Weight	19.890(Typ.)	21.879(Max.)	g	Single Chip

2 Absolute Maximum Ratings

Table 2 Absolute Maximum Ratings

Item	Symbol	Min.	Max.	Unit	Conditions
LC Operating Voltage	V_{op}	-5	5	V	(1),(2),(3),(4)
Operating Temperature	T_{gs}	-20	70	°C	
Storage Temperature	T_a	-30	80	°C	
Operating Humidity	H_{op}	10	90	%RH	
Storage Humidity	H_{st}	10	90	%RH	

- Note(1) All the parameters specified in the table are absolute maximum rating values that may cause faulty operation or unrecoverable damage, if exceeded. It is recommended to follow the typical value.
- Note(2) All the contents of electro-optical specifications and display fineness are guaranteed under Normal Conditions. Normal conditions are defined as: Temperature: 25°C, Humidity: 55± 10%RH.
- Note(3) Unpredictable results may occur when it was used in extreme conditions. T_a = Ambient Temperature, T_{gs} = Glass Surface Temperature. All the display fineness should be inspected under normal conditions.
- Note(4) Wet bulb temperature should be lower than 57.8°C, and no condensation of water. Besides, protect the module from static electricity.

Document No.		Made/Revised date	2019/03/14	Ver.	V01

3 Electrical Specifications

Table 3 Electrical Specifications

No.	Item	Min.	Typ.	Max.	Unit
1	Vcom voltage	-1.27	-0.77	-0.27	V
2	Frame Rate	55	60	65	Hz
3	VGH voltage	14	15	16	V
4	VGL voltage	-12	-11	-10	V

- Note(1) Both VGH and VGL are TFT gate operation voltage.
- Note(2) The setting of electrical parameters should follow the initial code specified by IVO. Vcom must be adjusted to optimize display quality.
- Note(3) All the contents of electrical specifications and display fineness are guaranteed under Normal Conditions. Normal conditions are defined as follow: Temperature: 25℃, Humidity: 55± 10%RH.

4 Optical Characteristics

The optical characteristics are measured under stable conditions as following notes.

Table 4 Optical Characteristics

Item	Conditions	Min.	Typ.	Max.	Unit	Note	
Transmittance	Center	3.5	3.9	-	%	Under C-light (1),(5),(7),(8),(10) $\theta_x=\theta_y=0^\circ$	
Contrast Ratio	Center	1000	1200	-	-	(1),(3),(6),(7),(8) $\theta_x=\theta_y=0^\circ$	
Response Time	Rising + Falling	-	35	40	ms	(1),(4),(6),(7),(8) $\theta_x=\theta_y=0^\circ$	
CF Color Chromaticity (CIE1931)	Red x	Typ -0.03	0.657	Typ +0.03	-	Under C-light (1),(5),(8) $\theta_x=\theta_y=0^\circ$	
	Red y		0.322		-		
	Green x		0.276		-		
	Green y		0.599		-		
	Blue x		0.137		-		
	Blue y		0.101		-		
	White x		0.298		-		
White y	0.334	-					
NTSC	CIE1931	68	70	-	%		
Viewing Angle (CR≥10)	Horizontal	θ_{x+}	80	85	-	degree	(1),(2),(6),(7),(8)
		θ_{x-}	80	85	-		
	Vertical	θ_{y+}	80	85	-		
		θ_{y-}	80	85	-		

Document name	C060SWR5-1 Customer Approval Specification			Page 8 of 26	
Document No.		Made/Revised date	2019/03/14	Ver.	V01

Note(1) Measurement Setup:

The LCD module should be stabilized at given ambient temperature (25°C) for 30 minutes to avoid abrupt temperature changing during measuring. In order to stabilize the luminance, the measurement should be executed after lighting backlight for 30 minutes in the windless room.

Figure 1 Optical Characteristic Measurement Equipment and Method

Note(2) Definition of Viewing Angle.

Figure 2 Definition of Viewing Angle

Document name	C060SWR5-1 Customer Approval Specification			Page 9 of 26	
Document No.		Made/Revised date	2019/03/14	Ver.	V01

Note(3) Definition of Contrast Ratio (CR)

The contrast ratio can be calculated by the following expression:

$$\text{Contrast Ratio (CR)} = \frac{L_{255}}{L_0}$$

L_{255} : Luminance of gray level 255, L_0 : Luminance of gray level 0

Note(4) Definition of Response Time

Figure 5 Back Light Spectrum

- Note(7) The polarizer type: SLP-5115AS-10-T-S11/CF; SLP-5115-10-T-S11/TFT.
- Note(8) All optical data are based on IVO given system & nominal parameter & testing machine in this document.
- Note(9) The direction of polarizer. It is recommended that customer should choose O Mode or E Mode according to the actual situation.

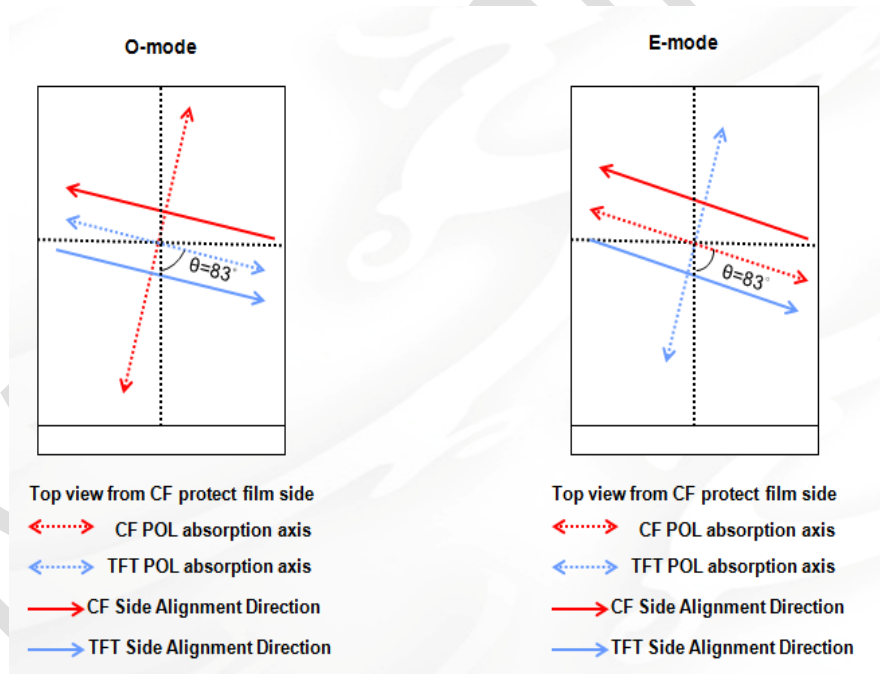

Figure 6 Polarizer Direction

- Note(10) Considering each custom's spectrum of BL is different, we define transmittance spec based on C-light source (standard light source). The differences may exist, when measure transmittance with unlike BL spectrum. If you have any questions, please contact IVO FAE

8 Reliability Condition

Table 8 Reliability Condition

NO	Item	Condition
1	High temperature Operation	$T_{gs}=70^{\circ}\text{C}$,240hours
2	Low temperature Operation	$T_a=-20^{\circ}\text{C}$,240hours
3	High temperature Storage	$T_a=80^{\circ}\text{C}$,240hours
4	Low temperature Storage	$T_a=-30^{\circ}\text{C}$,240hours
5	High temperature/High humidity Operation	$T_{gs}=60^{\circ}\text{C}$, 90%RH,240hours

- Note(1) A sample can only have one test. Outward appearance, image quality and optical data can only be checked at normal conditions according to the IVO document before reliable test. Only check the function of the panel after reliability test.
- Note(2) The setting of electrical parameters should follow the initial code specified by IVO before reliability test. Besides, in OTP mode, Vcom must be adjusted to optimize display quality. It is recommended to use the backlight that specified by IVO.
- Note(3) The sample must be released for 24 hours under normal conditions before judging. Furthermore, all the judgment must be made under normal conditions. Normal conditions are defined as follow: Temperature: 25°C , Humidity: $55\pm 10\%\text{RH}$. T_a = Ambient Temperature, T_{gs} = Glass Surface Temperature.
- Note(4) During the test, it is unaccepted to have condensate water remains. Besides, protect the module from static electricity.

Document No.		Made/Revised date	2019/03/14	Ver.	V01

10 General Precaution

10.1 Use Restriction

This product is not authorized for using in life supporting systems, aircraft navigation control systems, military systems and any other appliance where performance failure could be life-threatening or lead to be catastrophic.

10.2 Operation Precaution

- (1) The LCD product should be operated under normal conditions.
Normal conditions are defined as below:
Temperature: 25°C
Humidity: 55±10%
Display pattern: continually changing pattern (Not stationary)
- (2) Brightness and response time depend on the temperature. (It needs more time to reach normal brightness in low temperature.)
- (3) Image sticking may occur when the module displayed the same pattern for long time.
- (4) Do not connect or disconnect the panel in the “power on” condition. Power supply should always be turned on/off by the “power on/off sequence”

10.3 Handling Precaution

- (1) All the operators should be electrically grounded through adequate methods such as an anti-static wrist band, and with ionized air blowing to the panel surface when handling.
- (2) Dressing finger-stalls out of the gloves is important for keeping the panel clean during the incoming inspection and the process of assembly.
- (3) Do not apply strong mechanical impact or static load to the panel, so as to avoid breaking it.
- (4) Clean the panel gently with absorbent cotton or soft cloth when it is dirty.
- (5) Wipe off saliva or water drops on the polarizer, as soon as possible. Otherwise, it may cause deformation and fading of color.
- (6) Desirable cleaners are IPA (Isopropyl Alcohol) or hexane. Do not use Ketone type materials (ex. Acetone), Ethyl alcohol, Toluene, Ethyl acid or Methyl chloride. It might permanent damage to the polarizer due to chemical reaction.
- (7) When expose to drastic fluctuation of temperature (hot to cold or cold to hot), the LCD panel may be affected; It is necessary for you to pay attention to condensation when the ambient temperature drops suddenly. Condensate water would damage the polarizer and electrical contacted parts of the panel. Besides, smear or spot will remain after condensate water evaporating.
- (8) The TFT-LCD Panel shall be installed flat, without twisting or bending
- (9) If the liquid crystal material leaks from the panel, keep it away from the eyes and mouth. In case of contact with hands, legs or clothes, it must be clean with soap thoroughly.

Document name	C060SWR5-1 Customer Approval Specification			Page 25 of 26	
Document No.		Made/Revised date	2019/03/14	Ver.	V01

10.4 Storage Precaution

When storing the product as spares for a long time, the following precautions are necessary.

- (1) Store them in a dark place. Do not expose to sunlight or fluorescent light. Keep the temperature between 5°C and 35°C at normal humidity.
- (2) The product's glass surface should not come in contact with any other object. It is recommended that they be stored in the container in which they were shipped.
- (3) It is recommended to use it in a short-time period, after it's unpacked. Otherwise, we would not guarantee the quality.

10.5 Reprocessing Precaution

In order to ensure original product status, protective measures must be assessed before any reprocessing, including UV, ESD and high temperature prevention, etc.. Product storage and usage condition also must be considered. For glass slimming process, we insist to strictly observe IVO standard operation procedure 《Slimming Process Instruction》.

10.6 Disposal

When disposing LCD panel, obey the local environmental regulations.
